Sir:

This is in response to the Restriction Requirement of May 20, 2004, in connection with the above identified application.

The Group I invention is elected without traverse.

This election was made by the cancellation of claims 13-21 in the Preliminary Amendment filed with this application. The claims now remaining in the application are claims 1-12.

The above situation was confirmed with Examiner Zimmerman by telephone conversation on May 24, 2004.

An action on the merits of claims 1-12 is now believed to be in order. Such action should take into consideration the prosecution in the parent application.
